

## Commonwealth Information Security Council Web Applications Committee Meeting

**October 18, 2010  
2:00 – 3:00pm  
Washington Conference Room CESC**

**WebApps Committee members attending:**

John Willinger, DBHDS

**Commonwealth Security and Risk Management Staff attending:**

Jon Smith, VITA

**WebApps Committee members absent:**

Andrew Hallberg, ABC

Doug Mack, ABC

**Also attending:**

None

**Discussion:**

Discussed the Open Web Application Security Project (OWASP) top ten application security threats located at the following url:

[http://www.owasp.org/index.php/Top\\_10\\_2010-Main](http://www.owasp.org/index.php/Top_10_2010-Main)

WebApps Committee will create cover page and use OWASP as the base for the draft Application Security Standard.

Mike Watson (Commonwealth Security) conducted scans of numerous agencies web applications. Michael stated that the results of those scans were conclusive that the most significant vulnerabilities identified in those web application scans were consistent with the OWASP top ten (such as cross-site scripting and cross-site request forgery).

Upon completion the document will be publish to:

Security Portal

VITA public website under security

Goal is to have it ready for when Mike Watson presents his findings to executive management so that this is can be used with his presentation.

Question: Should we include free scanning tools (links)?

We should also ensure to mention CSRM doing scanning of agency web applications.

Have a draft ready to present by the beginning of November 2010.

**Next Meeting:**

November 15, 2010

2:00 – 3:00pm

Washington Conference Room CESC
